ENHANCED™ 72 LINERS

FOR FAST TURNS, BEST FINISH, & INCREASED PROFITS

Enhanced™ 72s are our high-performance liners that are the result of a proprietary growing formula and unique tray design that contribute to better branching, more consistent flowering, and a shorter crop time for you. This means you can increase the number of crop turns for early season sales or implement a later production start for greenhouse energy savings, both of which translate into increased profits.

THE SECRET TO ENHANCED 72s SUCCESS

- All liners are lit, spaced, PRG'd and pinched before shipping to decrease finish time —typically 3-4 weeks vs 5-8 with standard liners
- Grown out in trays of 6 strips of 12 liners for more spacing resulting in healthier roots and consistent finish – compact, better branched and toned plants
- Shipped as full trays of 72, so you get the benefits of spacing along with the efficiency of increased plant material
- No additional PGR's or pinching needed reducing chemical and labor costs
- Available only in crops that benefit the most from these treatments
- Quick turn programs allow you to turn more product out of the greenhouse or begin production later in the season for increased efficiency and more profit
- Excellent sell-through at retail; extended shelf-life

PW PROVEN WINNERS®   Proven Selections®

*Butterfly Argyranthemum Grown
with Enhanced™ 72 Liners*
2 Weeks After Planting

*Butterfly Argyranthemum Grown
with Enhanced™ 72 Liners*
3-4 Weeks After Planting

Liner Size	72 (6 Strips of 12)
Liner Ship Weeks	Primarily 9-22
